

Project Design Phase-I Solution Architecture

Date	23th October 2023
Team ID	592416
Project Name	Project – Fraud Detection using ML
Maximum Marks	4 Marks

Team Members

1. Aryan Sharma (21BBS0106)
2. Arjun Malhotra (21BBS0110)
3. Pranav Singh Mahara (21BBS0188)
4. Kanishak Khanna (21BCI0147)

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
